

Any dentist can provide orthodontic care, but AAO members have 2-3 years of additional education in an American Dental Association accredited program. AAO members have training and experience that makes them uniquely qualified to provide the highest quality of orthodontic care.

This symbol means:

- ✓ Has at least 2-3 years of specialized training in orthodontics after dental school
- ✓ Limits practice exclusively to orthodontics
- ✓ Is eligible for certification by the American Board of Orthodontics
- ✓ Adheres to the strict Principles of Ethics of the American Association of Orthodontists
- ✓ Fulfills continuing education requirements to provide you with the best in diagnosis and current treatment options
- ✓ Will be your partner, working with you to achieve optimum oral health
